### Automatic Chemical Controller Communication Goes Wireless

Saint Louis, Missouri – June 1, 2006 – **BECS Technology**, producer of the world's most reliable aquatics controllers since 1991, is proud to introduce the **BECSysRF**. The **BECSysRF** is a Wireless Communication Module that provides communication to the controller without the hassle of running cables.

The **BECSysRF** Wireless Communication Module is available from a distribution network that includes the top distributors and builders throughout the US and Canada. Please contact us for distribution information.

Being able to monitor and control the Chemical Controller without having to go down to the mechanical room has become a desirable option in a lot of facilities. The hassle of running phone lines or cables has been the biggest obstacle. **WORRY NO MORE!!!**

The **BECSysRF** is based upon 900MHz spread-spectrum technology, replacing lengthy serial cables with a simple wireless connection. Spread-spectrum technology minimizes interference created by other wireless devices operating in the area. Wireless signals can reach over 1 mile line-of-sight; somewhat less with obstructions. Most non-metallic obstructions can be easily penetrated with this product, providing a consistent and reliable data signal.

**BECS Technology Inc.** is a diversified design, engineering, manufacturing, and service firm dedicated to providing innovative and reliable solutions to the Aquatics, Agriculture, Refrigeration, and Library Automation markets. In the Aquatics market, **BECS** specializes in water chemistry and automated filter backwash controls. Products are designed and manufactured at the company's 24,000 ft<sup>2</sup> plant located in St. Louis, Missouri. This facility houses **BECS'** full-scale Circuit-Board Assembly Department, with both surface mount and through-hole capabilities, its Product Engineering Department, and also the company's Product Testing Lab, where all designs are rigorously tested and qualified prior to release. Visit [www.becs.com](http://www.becs.com) for more information.
